

Hanging out the Dirty Data

When you have got some data the first thing you need to do is to check it out and get rid of any obviously wrong or false data. This is called “Cleaning the Data”.

In Spreadsheet ‘**Dirty**’ several playful pupils have been deliberately tampering with the data. See if you can spot which rows and cells have been interfered with and by which of the following characters:

Pointy Pete : who moves Decimal Points around and adds unnecessary ones.

Obvious Olive : who puts in very obvious errors.

Silly Samantha : who thinks it is funny to answer the question Name? As “Donald Duck”

Devious Dave :who thinks up clever ways to change the data

Download the Excel spreadsheet or find a copy of it on page 2.

Can you make some decisions about what to do with the dirty data? Investigate the Spreadsheet further and try to come up with a

Sparkly Clean Final Version!

' Dirty' Spreadsheet

Row 1	Boy or girl	Date of Birth	School Year	Born in	Height Length	Foot	Fav Subject	Distance to School
