

Living in the Computer Age

The time we live in is sometimes called the **Computer Age** because of the changes that have been made to our lives by Computers.

Think of all the things that computers can do for us and then describe what they have replaced.

Things Computers Are Use For Today	Things Computers Replace
eg Sending email messages to friends	Letters and Postcards sent by the Royal Mail and notes handed across the classroom or passed from person to person.

Do you think that computers have improved peoples lives or not ?

Discuss your views with a friend and write down some advantages and some disadvantages of living in the Computer Age.

Add a third column titled "**Computer use in the Future**".
 The example about email could say "**Schools use email to send newsletters and notes to parents.**
Parents send in absence notes. Far less paper !"
